Rentageek is a full service Information Technology solutions provider for the Home and SME market. Or - in English - **we look after all your computer needs!** You may use your computer just for email and internet or be a national business – we can help you.

We have been in the Information Technology business for more than 12 years, with experience in all the major cities in South Africa and some of the more outlying remote villages of the country. Whoever you are, wherever you are, we can help you.

Our main business remains the provision of full service on-site solutions to residential and business customers.

We are here to offer **education, real-time trouble-shooting, and preventative maintenance** for your technology.

### Helping You

We are also here to help you through challenges you may encounter while working with technology, such as creating documents, email, networking, installing new programs, and more. We do this in a relaxed and fun atmosphere that helps relieve the stress many people experience when faced with technology questions and problems. We are very good listeners, and respond in language you will easily understand, providing expert advice that you can apply with confidence, right away.

We value education and make it our mission to help you better use and enjoy your software and hardware. Contact us for helpful advice, from prevention of viruses and system failures to new and useful computing techniques. If you want to learn more about a specific technology issue, call us today!
